

1. For each **therapeutic drug class**, please answer the following:
  - a. Is the class reasonably related to the treatment of the allowed conditions?
  - b. Is the class reasonably necessary for the treatment of the allowed conditions?
  - c. Is the cost of the class medically reasonable for the treatment of the allowed conditions, i.e. is the use of this class appropriate resource utilization?
2. For each **specific drug**, including its prescribed **dosage and duration**, please answer the following:
  - a. Is the drug, as prescribed, reasonably related to the treatment of the allowed conditions?
  - b. Is the drug, as prescribed, reasonably necessary for the treatment of the allowed conditions?
  - c. Is the cost of the drug, as prescribed, medically reasonable, for the treatment of the allowed conditions, i.e. is the drug, as prescribed, appropriate resource utilization?
3. With the understanding that all drugs are potentially harmful, please answer the following:
  - a. Does the potential harm of any of the prescribed drugs in the amounts currently prescribed substantially outweigh the expected medical benefit of the drug?
  - b. If yes, is there a medically supported alternative medication for treatment of the allowed condition?
  - c. Is the combination of currently prescribed drugs in compliance with best practices?
